Experience

Nebulaa Innovations Pvt Ltd (ParadigmIT Technology Services Pvt Ltd)

System Engineer – Full Stack Developer (Graduate Trainee)

Dec 2023 – Present

Hyderabad

- Led the development of **scalable full-stack systems** using React and Flask, optimizing **backend workflows**, **PostgreSQL queries**, and **Redis caching** to improve **performance, reliability, and maintainability** across production environments.
- Cut release time by 90%**; owned and implemented a **CI/CD pipeline (Bitbucket Pipelines)** with automated testing and deployment
- Reduced average ticket resolution time by 50%** by redesigning and optimizing the **web-based support system** and streamlining workflow processes
- Developed a **real-time analytics dashboard** enabling centralized KPI monitoring and efficient handling of **millions of records** through optimized query indexing, partitioning, and data aggregation workflows.
- Independently designed and built a custom ERP system from the ground up**, enhancing data management and significantly improving operational efficiency across departments; enabled transparent inventory tracking and delivered actionable analytics to ensure optimal stock availability.
- Implemented a scalable security framework using Role-Based Access Control (RBAC) and JWT authentication**, enhancing data privacy, securing endpoints, and enabling fine-grained access control.
- Tech Stack:** React.js, JavaScript, Flask, PostgreSQL, Redis, Bitbucket Pipelines, Material-UI, Bootstrap, Recharts

Projects

Alex AI Assistant

Mar 2026 – Present

- Built a **production-style RAG system** for context-aware Q&A over structured data, focused on improving retrieval relevance and reducing hallucination
- Implemented advanced retrieval workflows using **semantic chunking**, **query normalization**, **multi-query retrieval**, and **reranking** to improve context quality
- Developed an eval-driven RAG workflow with **50+ recruiter-style benchmark queries** to measure retrieval precision, faithfulness, latency, and cache performance for continuous optimization
- Reduced **LLM cost and latency by 20%** using **Redis-based semantic caching** and optimized query handling
- Built modular retrieval, caching, and evaluation layers to improve maintainability, observability, and debugging of LLM workflows
- Tech Stack:** Python, FastAPI, LangChain, LangSmith, Redis, FAISS, AsyncIO, Google AI APIs

Co-curricular Activities

- 2021 Student Volunteer in Convocation Events Management Team
- 2019 Student Volunteer in Ignus Publicity and Media Team

Technical Skills

- Languages:** Python, SQL, JavaScript
- AI Systems:** RAG, LangChain, LangSmith, OpenRouter, Google AI APIs
- Retrieval:** FAISS, Hybrid Search, Reranking
- Evaluation:** LLM Evaluation, Hallucination Tracking
- Backend:** FastAPI, Flask, AsyncIO
- Data:** PostgreSQL, Redis
- Infra:** Docker, Docker Swarm, Nginx, Bitbucket Pipelines
- Frontend:** React.js, Material-UI, Bootstrap

Achievements

- HackerRank Gold Badge (Python)**
- Solved 300+ DSA problems**
- Python Certificate (HackerRank)**
- Problem Solving Certificate (HackerRank)**

Education

Bachelor of Technology (B.Tech) in Mechanical Engineering

Indian Institute of Technology, Jodhpur

2019 – 2023

Course Work

- Python for Everybody
- Python for Data Science, AI & Development
- Data Structures and Algorithms
- Introduction to Computer Science
- Introduction to Machine Learning
- Introduction to IoT Systems
- Computer Networks (CN)
